

DAN ANDREEA-MARIA

PROFILE

Junior Full-Stack Web Developer transitioning from an engineering and technical support background into software development. Focused on building web applications using JavaScript, React, Python, Flask and Django. Completed Harvard CS50x and CS50 Web Programming, alongside multiple full-stack and frontend projects demonstrating practical application of backend and frontend development concepts.

PROJECTS

Wellbeing Journal App

- Full-stack journaling web application built with Django, Python and JavaScript allowing users to create, manage and organize personal journal entries.
- Implemented user authentication and protected routes for secure access to personal data
- Developed CRUD functionality for journal entries with database integration
- Designed logic to generate basic wellbeing suggestions based on user input
- Built a responsive interface for seamless use across desktop and mobile devices

Sweet3Generation Website

- Responsive business website built with HTML, CSS and JavaScript for a local business presence.
- Designed and developed a multi-section website with responsive layout across devices
- Integrated Google Maps to display business location and improve user accessibility
- Implemented basic SEO structure including metadata and semantic HTML for search visibility
- Optimized UI layout for readability and mobile-first user experience

EDUCATION

2018 - 2020

POLYTECHNIC UNIVERSITY OF
TIMIȘOARA - FACULTY OF
ENGINEERING HUNEDOARA

- Master of Electrical Engineering

2014 - 2018

POLYTECHNIC UNIVERSITY OF
TIMIȘOARA - FACULTY OF
ENGINEERING HUNEDOARA

- Engineering Degree

SKILLS

Frontend

- HTML
- CSS
- JavaScript
- React
- Tailwind CSS
- Bootstrap

Backend

- Python
- Flask
- Django

Tools

- Git
- GitHub
- Vite
- Visual Studio code

LANGUAGES

- Romanian (native)
- English

CS50x Final Project

- Full-stack web application developed as a capstone prproject using Flask, Python, SQL and JavaScript.

Implemented user authentication system with session management

- Designed and built relational database structure using SQL for persistent data storage
- Developed dynamic frontend interactions integrated with backend Flask routes
- Created a functional full-stack application demonstrating end-to-end web development concepts

ACHIEVEMENTS

Codédex Coding Challenges & Hackathons

2022 - Present

- Winner of Codédex Monthly Challenge and Hackathon, demonstrating strong problem-solving skills under time conditions
- Solved algorithmic and logic-bases programming challenges using Python and JavaScript, focusing on efficiency and correctness
- Participated in community coding events involving peer feedback, solution review and iterative improvement of implementations
- Published solutions and project repositories on GitHub showcasing consistent practice in problem-solving and coding fundamentals

WORK EXPERIENCE

Ultra Special Computer

2018 - 2020

Computer and network equipment technician

- Diagnosed and resolved hardware, software and operating system issues for an average of 5-7 clients daily, restoring functionality and minimizing downtime.
- Assembled, configured and deployed custom desktop systems for individual clients and business customers, including hardware installation, operating system deployment and software setup.
- Provided technical support and maintenance services for small and medim-sized businesses, ensuring reliable operation of workstations and peripheral devices.

- Troubleshoot and repaired computer systems, identifying root causes of technical issues and implementing effective solutions to improve system performance.
- Assisted clients with hardware upgrades, operating system installations and system configuration, delivering solutions tailored to business and individual requirements.

Joom

2020 - 2021

Customer Support Agent

- Assisted customers in Romanian and English with order inquiries, warranty claims, refunds and account-related issues through written support channels.
- Investigated customer cases and escalated complex issues to specialized teams, ensuring timely resolution and adherence to support procedures.
- Managed support tickets using predefined workflows and communication templates while maintaining clear and professional customer interactions.
- Collaborated with international support teams through regular meetings to discuss case updates, process improvements and operational priorities.
- Resolved customer concerns by providing accurate information regarding orders, shipping status, returns and marketplace policies.

Career Break & Professional Development

2022 - Present

- Provided family caregiving support while transitioning into web development through structured self-study and project-based learning.
- Completed CS50x and CS50 Web Programming coursework covering computer science fundamentals and full-stack web development.
- Built multiple web applications using Python, JavaScript, Django and Flask.
- Actively developing practical skills through personal projects and continuous learning.
