PROFESSIONAL SUMMARY

Junior Full-Stack Developer with a Master's degree in Electrical Engineering and a background in IT technical support. Dedicated 2+ years to intensive full-time self-study and software engineering upskilling, graduating from Harvard's CS50 courses and building production-ready applications. Skilled in Python (Flask, Django), JavaScript, SQL, and modern LLM/Agentic AI workflows. Proven problem solver with hackathon achievements, seeking a Software Developer role.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), HTML5, CSS3, SQL
- **Frontend & AI Architectures:** React, Tailwind CSS, Bootstrap, Agentic AI Workflows / LLM Integration
- **Backend & Databases:** Flask, Django, SQLite, PostgreSQL, RESTful APIs
- **Tools & Version Control:** Git, GitHub, Vite, VS Code, Cloudflare Workers
- **Hosting & Deployment:** Cloudflare Workers (Serverless/Edge), Web Hosting & Server Administration, Domain Configuration
- **Digital & Multimedia:** Product/Brand Photography, Web Asset Optimization, UI/UX Design

SOFTWARE ENGINEERING PROJECTS

ChefMate — Agentic AI Web Application

2026

Technologies: Python, Flask/FastAPI, JavaScript, Agentic AI Logic, Bootstrap 5, REST API

- Architected and deployed a full-stack web application leveraging autonomous Agentic AI workflows to generate, adapt, and refine personalized recipes based on ingredient availability and constraints.
- Engineered prompt pipelines and multi-agent reasoning logic to orchestrate decision-making and structured output formatting.
- Designed a responsive frontend UI communicating seamlessly with backend AI endpoints.

Sweet 3 Generation – Full-Stack Web Project

2025

Link: www.sweet3generation.ro | Technologies: HTML5, CSS3, JavaScript

- **Front-End Development:** Designed and built the website entirely from scratch using HTML5, CSS3, and JavaScript, ensuring a fully responsive user experience.
- **Visual Content & Branding:** Shot and edited all original product/brand photography, optimizing images for fast web performance.
- **Hosting & Server Management:** Managed domain registration, server setup, web hosting configuration, and ongoing maintenance.

Wellbeing Journal Application

2025

Technologies: Python, Django, JavaScript, SQLite, HTML/CSS

- Developed a full-stack journaling platform featuring secure user authentication, session security, and complete CRUD operations.
- Designed relational database schemas and dynamic UI components to deliver user wellbeing suggestions.

CS50 Capstone Web Project

2025

Technologies: Python, Flask, SQL, JavaScript, HTML5/CSS3

- Built an end-to-end full-stack web application implementing custom user authentication, SQL database persistence, and interactive dynamic frontend components.

Personal Portfolio Hub

2025

Link: portfolio.deea-u90.workers.dev

- **Modern Deployment:** Developed a central project showcase hosted on Cloudflare Workers using modern serverless/edge technology.

- **Cloud Architecture:** Highlights familiarity with modern web deployment, high availability, and performance optimization.

ACHIEVEMENTS & CODING COMPETITIONS

- **Codédex Monthly Challenges & Hackathon Winner (2022 – Present):** Secured 1st place in algorithmic programming challenges using multiple programming languages under time constraints.
- **Open Source & GitHub Practice:** Maintained consistent commit activity building algorithms and personal project repositories.

EDUCATION & CREDENTIALS

Harvard CS50x & CS50 Web Programming Certifications	2025
<i>edX / Harvard University — Computer Science & Full-Stack Web Development</i>	
Master of Science in Electrical Engineering	2018 – 2020
<i>Polytechnic University of Timișoara — Faculty of Engineering Hunedoara</i>	
Bachelor of Science in Engineering (4-Year Degree)	2014 – 2018
<i>Polytechnic University of Timișoara — Faculty of Engineering Hunedoara</i>	

WORK EXPERIENCE & CAREER TRANSITION

Full-Time Software Engineering Upskilling	2022 – Present
<i>Self-Directed Learning & Independent Project Developer</i>	
▪ Dedicated full-time efforts to a planned career transition into software engineering, supported by rigorous self-study (CS50 track), daily algorithmic practice, and building production-grade web applications.	
Joom Marketplace — Customer Support Specialist (Remote)	2020 – 2021
▪ Managed technical support tickets, case investigations, and international client communication in English and Romanian.	
Ultra Special Computer — Computer Technician & Sales Specialist	2018 – 2020
▪ Hardware & Software Technical Support: Assembled custom PCs from scratch (CPU, motherboard, components), diagnosed/repaired laptops and printers, performed OS installation, HDD/SSD cloning, and data migration. ▪ IT Retail & Customer Advisory: Provided technical guidance to customers, sold hardware, laptops, and peripherals, managed customer invoicing, and inventory.
